- **Platforms:** Windows 7, Windows 8, Windows 10, Mac OS, UNIX

EXPERIENCE

Web developer   February 2018 – March 2020
One-to-Many Solutions   Rockville, MD

- Effectively worked on coding of custom WordPress theme and template files using HTML, CSS, PHP, and Bootstrap 3 framework.
- Administered project collaboration; solely responsible for digital workflow, backups, and project management.
- Designed and developed GUI for applications and modules, using JavaScript
- Designed and maintained intranet and Internet website, provided technical support in creating content areas; built on-line forms and connected them to databases.
- Participated and designed responsive websites to accommodate mobile platforms.
- Built and created GUI and also used scripting languages like PHP to interact with databases on server-side development.
- Update, modification and access control of SharePoint sites, support and maintain Active Directory.
- Created indexes, views, complex Stored Procedures, user defined functions, cursors, derived tables, common table expressions (CTEs) and Triggers to facilitate efficient data manipulation and data consistency.
- Installed, tested, and resolved problems with computer hardware and software; adapted existing software to accommodate the database needs of departments.

Java developer
PayPal   May 2017 – December 2018
                                                                                   Timonium, MD
- Designed UI using HTML, CSS and JavaScript.
- Instantiated business objects with IOC pattern using spring framework and for Dependency Injection.
- Implemented Object-relation mapping in the persistence layer using Hibernate framework in conjunction with spring functionality.
- Worked on writing Java code for extracting backend data from the main frames.
- Used Maven to manage dependencies in the application and deploy it on Apache Tomcat server.
- Used Oracle database to maintain the abstracts and references.
- Used Agile process for tracking and developing the application.
- Effectively worked in the development and Integration of the Application using Eclipse IDE.
- Implemented the integration with the back-end system with web services using SOAP.
- Utilized JUnit test cases for all the developed modules.

Help Desk Analyst
T. Rowe Price   Dec 2016 – May 2017
                                                                                   Baltimore, MD

- Served as the first point of contact for internal and external T. Rowe Price clients seeking technical assistance over the phone or email.

- IT Service management and support experience with ServiceNow.
- Performed password administration and access support for Active Directory, PeopleSoft and several internal/proprietary systems and applications.
- Performed remote troubleshooting through diagnostic techniques and related questions.
- Created and managed user profiles with OREMS.
- Experienced in multiple IT Disciplines including desktop hardware/software.
